¹ Enphase requires Wi-Fi or Ethernet as a primary mode of interconnectivity for any system with IQ Battery 5P. Refer to the IQ Gateway data sheet for details.

² This refers to load disruption during grid blackout. When transitioning to backup, the total power of the IQ Battery installed needs to be greater than the loads present. Load disruption time may vary based on other grid conditions. Contact Enphase Support for more details.

³ Refers to the time from which grid outage happens to the time when grid(ATS/MID) relays open up.
